PROFILE

Data Analyst with hands-on experience designing SQL data warehouses, Power BI dashboards, and DAX-driven data models and Data Modeling. Built three end-to-end analytics projects spanning ETL, star-schema design, and Row-Level Security — turning raw, multi-table datasets into business-ready insights. Currently deepening expertise in DAX, Power Query, and BI development.

EDUCATION

B.E – Electronics and Communication Engineering

2021 – 2025

Sri Shakthi Institute of Engineering and Technology, Coimbatore | CGPA: 7.29

SKILLS

Business Intelligence — Power BI | DAX | Power Query (M) | Excel

Python(Basics) & SQL — Pandas | Numpy | Matplotlib | MySQL

Tools & Technologies — Git | GitHub | VScode

PROJECTS

End-to-End SQL Data Analytics Project(SQL) 📄, MySQL | ETL | Data Warehousing | Star Schema | (EDA) | Advanced SQL |

- Architected a **Medallion Warehouse (Bronze, Silver, Gold)** in MySQL ingesting 6 raw **CRM/ERP** source tables .
- Designed a **star schema** with **dim** tables (customers, products) and a **fact** table (sales), enabling self-service reporting.
- Performed **(EDA)** to identify the **top 10** revenue-generating customers and distribution ,total revenue and key metrics.
- Used Advanced analytics(**CTEs, Window Functions, Views, Joins, Agg, CASE , Subqueries**) to build a **customer** report.
- Imported the Gold layer to **Power BI** , validated **data types** and applied transformations in Power Query, then **published** an interactive dashboard using **Quick Insights** and pinned tiles in **Power BI Service**
- Managed the project workflow using **Git and GitHub**, with structured documentation through README files.

Data Jobs Analytics Dashboard (Power BI) 📄, | Power BI, | Power Query (M) | DAX |

- Built two **interactive** Power BI dashboards analyzing job market data, progressing from a **KPI-focused** first version to an **advanced parameter-driven** final dashboard with a custom dark theme
- Designed **drill-through navigation** — users select a job title via slicer, trigger a bookmark button showing their selection, and drill through to a dedicated page with **role-specific KPIs** and visuals
- Developed a **star schema** and **data modeled** in **Power Query** (merged columns, validated relationships, advanced **M** transformations) and built **DAX** measures **Date Table** and parameters for dynamic reporting
- Used a mix of chart types including **slicers**, drill-through, **bookmarks**, buttons for interactive exploration
- Managed the project workflow using **Git and GitHub**, with structured documentation through README files.

Power BI Data Modeling & Star Schema Design 📄, | Data Modeling | Star Schema | ETL | DAX | (RLS)

- Transformed a complex dataset consisting of **23 interconnected tables** into a clean **star schema** by identifying business entities and designing **5 dim tables** and **6 fact tables** using Power Query.
- Applied rigorous **Power Query transformations**: referenced (not directly merged) source tables, removed duplicates, standardized data types,**snake_case**,naming, and **disabled load** on staging tables to keep the model clean for report.
- Built a robust **relational data model** by establishing relationships between fact and dimension tables to enforce a true **star** (not snowflake) **schema** using **indexed key columns**.
- Created a custom **Date table using DAX**, and implementing best practices for analytical reporting.
- Implemented **Row-Level Security (RLS)** using security table and validated access using "**View as Role**" testing .
- Created a **report** using quick insights in **power BI service** and uploaded the full project in **GitHub**.

INTERNSHIP

Data Analytics Intern NoviTech R&D Pvt. Ltd. |

May 2025 – Jun 2025

- Worked on data cleaning, analysis, and dashboard development using industry-standard tools.
- Learned core data analytics fundamentals in SQL, Power BI, Excel — pivot tables, formulas, and dashboard creation, along with basic automation using VBA macros.
- Gained introduction to Python for data analysis (**Pandas, NumPy**) and data visualization using Seaborn and **Matplotlib**.

CERTIFICATES

- Career Essentials in Data Analytics – Microsoft & LinkedIn Learning (2025) 📄
- Data Analytics Internship Certificate – NoviTech R&D Pvt. Ltd. (2025) 📄
