PROFILE

Aspiring Data Analyst with hands-on experience in Power BI, Advanced SQL, Excel, and Data Modeling. Built end-to-end data analytics projects involving ETL, data warehousing, EDA, advanced SQL analytics, Power BI and interactive dashboards. Passionate about transforming raw data into actionable business insights through data visualization and analytics. Currently strengthening expertise in DAX, Power Query, and BI.

SKILLS

Programming & Databases

- Python (Basics)
- SQL (Advanced)
- MySQL

Business Intelligence

- Power BI
- DAX
- Power Query (M)
- Excel

Tools & Technologies

- Git
- GitHub
- Tableau (Basic)

PROJECTS

End-to-End SQL Data Analytics Project (SQL) 🔗, MySQL | ETL | Data Warehousing | Star Schema | (EDA) | Advanced SQL |

- Designed and implemented a **Three-layer Data Warehouse (Bronze, Silver, Gold)** using MySQL, following ETL and dimensional modeling principles.
- Built a **business-ready star schema** with dimension and **fact** tables and **views** to support analytical reporting.
- Performed **Exploratory Data Analysis (EDA)** and **advanced SQL analytics** to generate business insights across customer, product, and sales data using SQL.
- Developed reusable SQL solutions using **CTEs, Window Functions, Views, Joins, Aggregations, CASE expressions, Subqueries.**
- Managed the project workflow using **Git and GitHub**, with structured documentation through README files.

Data Jobs Analytics Dashboard (Power BI) 🔗, | Power BI, | Power Query (M) | DAX |

- Built an interactive **Power BI dashboard** by performing **data transformation, data modeling, and visualization.**
- Developed a **star schema** data model and created **DAX measures** to analyze job market trends, salaries, and in-demand skills.
- Designed interactive reports including slicers, drill-through, **bookmarks**, buttons, and **parameters** to enhance user experience.
- Created dynamic bar, column, line, map, KPI, and table visualizations to deliver actionable business insights.
- Managed the project workflow using **Git and GitHub**, with structured documentation through README files.

Power BI Data Modeling & Star Schema Design 🔗, | Data Modeling | Star Schema | ETL | DAX | (RLS)

- Transformed a complex dataset consisting of **23 interconnected tables** into a scalable **star schema** by identifying business entities and designing **5 dim tables** and **3 fact tables** using Power Query.
- Performed **data transformation**, including merging queries, removing duplicates, standardizing (**snake_case**), eliminating redundant attributes, and disabling unnecessary source tables to optimize the data model.
- Built a robust **relational data model** by establishing relationships between fact and dimension tables, creating a custom **Date table using DAX**, and implementing best practices for analytical reporting.
- Implemented **Row-Level Security (RLS)** using security table and validated user data visibility through testing.
- Optimized the Power BI model by **referencing queries** instead of modifying source tables directly, reducing redundancy and preparing the model for scalable **DAX measures** and **reporting.**

INTERNSHIP

Data Analytics Intern NoviTech R&D Pvt. Ltd. |

May 2025 – Jun 2025

- Completed a one-month internship focused on SQL, Power BI, Excel, and data analytics fundamentals.
- Worked on data cleaning, analysis, and dashboard development using industry-standard tools.
- Strengthened practical knowledge of business intelligence and data visualization concepts.

CERTIFICATES

- Career Essentials in Data Analytics – Microsoft & LinkedIn Learning (2025) 🔗
- Data Analytics Internship Certificate – NoviTech R&D Pvt. Ltd. (2025) 🔗
